

HONDA CIVIC

'REFRESHING AND EXHILARATING EXPERIENCE'

- Building on 50 years of success, Civic is the latest Honda model offered exclusively as a hybrid – completing Honda's mission to electrify all European mainstream models by 2022
- Built on the development concept of 'exhilarating', Civic follows Honda's human-centric approach with a focus on dynamics, design and technology
- Efficient e:HEV system delivers high, instant torque level compared to rivals while delivering smooth and refined power
- Improved SENSING features and structural components ensure class-leading safety
- High standard specification including HONDA SENSING, heated front seats, front and rear parking sensors, dual auto climate control and LED headlights.

EFFICIENT AND RESPONSIVE POWERTRAIN

- New 2.0-litre direct-injection, Atkinson-cycle engine achieves an industry best 41% thermal efficiency
- New individual mode allows driver to tailor drivetrain and steering to personal preference
- Upated e:HEV system features high-output propulsion motor and the latest version of Honda's Intelligent Power Unit (IPU), which now features 72 cells
- 'Winding Road Detection' control logic ensures the petrol engine operation is maintained whilst cornering on winding roads, reducing lag on acceleration application
- Engine noise reduced by using additional insulation around intake manifold and a new urethane engine cover
- Engine vibration reduced by utilising a new high-rigidity crankshaft and a new secondary balancer shaft

PREMIUM, CONTEMPORARY INTERIOR DESIGN

- Generous space and usability
- 35mm longer wheelbase and a 20mm shorter rear overhang supports more expansive cabin
- Cleverly packaged hybrid components result in uncompromised interior space and usability
- Optimised noise reduction in engine bay and rear wheelhouse creates a quieter, more refined cabin
- A Civic first: Fully digital dash and instrumentation, in top grade models
- Touch points enhanced with tactile materials

NOISELESS, COUPE-LIKE DESIGN

- A sleek and sporty silhouette with a bonnet line 25mm lower, a lower glasshouse, and a more defined beltline than the previous generation
- Low belt line also improves visibility from the rear seats
- Sleek body profile, wider track and wheel arch hemming creates a sportier, ground-hugging stance
- A cleaner silhouette thanks to advanced laser brazing technology removing unnecessary lines on roof channels

CIVIC

LATEST GENERATION INFOTAINMENT

- Infotainment system positioning minimises up-and-down eye movement, improving natural operation.
- **Civic first: Full digital dial 10.2-inch HD display (top spec models only)**
- Apple CarPlay / Android Auto as standard
- **Eight speakers (Elegance and Sport grades); 12 premium BOSE speakers (Advance grade)**

DESIGNED FOR THE JOY OF DRIVING

- 35mm longer wheelbase and wider rear track improves stability on uneven roads
- **Low friction ball joints and revised front dampers improve dynamic feel**
- Increased body rigidity and revised suspension improves cornering stability and dynamic response
- **Network of interconnected structures increase body rigidity by 22%**
- Aluminium bonnet is 43% lighter than the previous model's steel panel, while the resin tailgate is 20% lighter than before resulting in a lightweight yet highly rigid body

ENHANCED SAFETY FEATURES

- 11th generation Civic features improved Honda SENSING safety technology
- **Wider angle front camera and enhanced recognition technology improve Civic's capacity to identify road objects**
- Eight sonar sensors detect non-metallic objects more reliably and with far greater accuracy than previous millimetre wave radar
- **New structural components have been incorporated to meet next-generation safety requirements, including additional door beams that improve side collision performance**
- Front bumper beam safety plate absorbs impact energy to reduce the risk of leg fractures and knee ligament damage in vehicle/pedestrian collisions

KEY FIGURES

Power & Torque	135kW, 315Nm
Performance (0-100km/h)	From 7.8 seconds
Economy (per 100km, WLTP)	From 4.6l/100km
Emissions (combined, WLTP)	From 108g/km
Max. Towing Weight (kg) braked	750
Max. Towing Weight (kg) unbraked	600
