Due to the limitations of the printing process, the colours reproduced may vary slightly from the actual paint colour and trim material. As a result, they should be used as a guide only. Your Opel dealer has a comprehensive display of paint finishes.

ZAFIRA-e LIFE TECH SPECIFICATIONS

Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive
- Braking (for increased regenerative braking)

Drive Mode Selector

The driver can determine the driving style through selecting one of the following modes:

- Power: with high power reserves for the highest top speed and torque. Recommended at full capacity.
- Normal: for a balanced drive that offers a compromise between performance and energy efficiency. WLTP range is validated in this mode.
- ECO: for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance.

Braking

Energy recuperation

The regenerative braking system works when the vehicle is in motion, energy created by the resistance of the brakes against the drivetrain is converted into DC voltage to partially recharge the battery. The driver can also engage braking mode through the drive selector to increase the level of energy recuperation.

Single foot driving experience

The system not only utilises the energy when the brakes are being used, but also engages when the vehicle is coasting, recovering more energy and enabling single foot driving as the brakes automatically engage when the throttle pedal is released.

DRIVETRAIN	50KWH
CO2 emissions	0g / km
Max power kW / PS	100 / 136
Max torque Nm / lb.ft.	260 / 192
Acceleration 0 - 100km/hr	13.1
Max speed kph	130
Transmission	Automatic electric drive with fixed gear ratio
Service Interval	Every 40,000km or 2 years (whichever comes sooner) Initial inspection at 20,000 miles or 1 year (whichever comes sooner)
Max payload KG	1226 (L1H1): 1198 (L2H1)

Battery	50KWH
Battery energy kWh	7.4kWh
EV range km (WLTP Combined)	207 - 230
Battery warranty	8 years / 160,000 km / 70% capacity

Charging	50KWH
Domestic 3 pin socket 2.3kWh	21 hours 45 minutes
Wallbox or public charger 7kW	7 hours 30 minutes
Public charger 11kW	5 hours
Rapid charger 100kWh (0 - 80%)	30 minutes

E&OE November 2022. The Vivaro-e is a battery electric vehicle requiring mains electricity for charging. Range data given has been determined according to WLTP test procedure methodology. The figures shown are intended for comparability purposes only and should only be compared to other cars tested to the same technical standard. The range you achieve under real world driving conditions will depend upon a number of factors, including but not limited to: the accessories fitted (pre and post registration); charging frequency; personal driving style; vehicle load and route characteristics; variations in weather; heating/air conditioning; pre-conditioning and battery condition. For more information, contact your local Opel Retailer. You can obtain 15-80% of the vehicle charge in 30 minutes from a 100kW rapid charging station and 15-80% of the vehicle charge in 45 minutes from a 50kW rapid charging station.
